Attention Rafter J Homeowners:

The Rafter J water system has incurred a leak on a main water transmission line. Clearwater Operations (contract water operator) is working on the issue and will restore service as quickly as possible. It is anticipated that **water service may not be restored today.**

A potable water truck is stationed in the Rafter J Office parking lot, and once water is restored, a subdivision-wide boil order will be issued.

The Rafter J Office will continue to provide updates as they are available via email and posting updates on the Rafter J website (www.rafterj.org).

If you or you hear of neighbors who are not receiving email notices from the Rafter J office, please encourage them to send their email information to the Rafter J office email (office@rafterj.org).

Thank you for your understanding while teams work as quickly as possible to repair the line and restore water pressure.

Sincerely,

Rafter J ISD
