Update #5

Attention Homeowners:

The first water sample was submitted to the lab this morning.

The water system remains stable and Clearwater is continuing to monitor all aspects of the water and wastewater systems.

Macy's is monitoring the levels in the tank at the potable water truck and will resupply when needed. The water truck will remain on-site at the Rafter J office for the duration of the boil order. *If you or anyone you know is experiencing difficulty obtaining water from the truck or boiling water at home, please let the Rafter J Office (307-733-5262, office@rafterj.org) know so we can provide assistance.*

Please follow the boil order notice protocols and refer to the additional best practices sheet that accompanied the boil order notice distributed yesterday.

The Rafter J Office will continue to provide updates as they are available via email and posting updates on the Rafter J website (www.rafterj.org).

If you hear of neighbors who are not receiving email notices from the Rafter J office, please encourage them to send their email information to the Rafter J office email (office@rafterj.org).

Sincerely,

Rafter J ISD
